

HALL RENDER ADVISORY SERVICES

AMBULATORY SURGERY CENTER SERVICES

As the consulting arm of Hall Render, Hall Render Advisory Services can draw upon the talent and resources of our diverse professionals to best serve our clients. By partnering professional consulting services with a national health care-focused law firm, our clients receive high quality advisory services supported by attorneys and advisors who understand every facet of the health care industry.

OUR APPROACH

Our advisors work with clients to assist them as they navigate the complex world of health care. Serving as trusted advisors, we work side-by-side with our clients to ensure there's a clear understanding of the final work product and to walk through the practical next steps and action items. We help our clients optimize their various processes to better align with their strategic goal by developing their internal resources to increase efficiencies. Through our continuous communication approach, we can align our efforts and guidance with both the immediate and future challenges by creating a framework that will help them achieve their objectives.

Ambulatory Surgery Center Services

We constantly monitor the landscape for trends, opportunities and threats that might impact our clients, providing actionable plans and hands-on support. With leadership experience ranging across the health care spectrum, our team of trusted advisors is available to provide practical and actionable guidance that fits your organization and needs.

OUR EXPERIENCE

With years of extensive experience, our advisors provide time-tested knowledge of the complex, highly regulated health care landscape and specific insights and recommendations to further your business objectives. Our growing network of health care clients encompasses a wide variety of entities, including hospitals and hospital systems, independent and affiliated outpatient and ambulatory facilities, community hospitals, long-term care facilities, large medical groups and solo practice physicians.

SERVICES

Starting a new venture is exciting, but the scope of detailed requirements can be daunting. Our advisors are able to help you navigate the administrative and operational complexities of opening a new ambulatory surgery center from the initial steps to opening for your first surgery case. At your request, our role can take any form along the continuum, from supplemental consulting to a complete outsourcing of the tasks to operationalize your new center.

A brief summary of the various service areas and representative tasks are outlined below.

- Compliance and Accreditation
- Environmental Services & Property Management
- Finance
- Governance

- Human Resources
- IT & Communications
- Marketing
- Medical Staff
- Procurement
- Revenue Cycle
- Risk Management
- Strategy

WE CAN HELP

Our advisors are capable of serving as the project manager and administrator across all these areas to ensure your ambulatory surgery center is operational. A detailed task list would be developed across these areas assigning target dates and accountability to meet deadlines, and routine meetings will be established to discuss progress and any issues impending progress.
