

WEBINAR | VIRTUAL CARE TECHNOLOGY AND MEDICAL RECORD STRATEGIES

Event: Virtual Care – Technology and Medical Record Strategies

[07/19/2022 - 1:00 - 2:00 PM ET]

Synopsis:

As health care providers look forward to the expiration of the public health emergency and telemedicine services are normalized, providers are beginning to evaluate, adopt and implement long-term solutions and strategies for the continued provision of telemedicine care and the inclusion of telemedicine care as a component of coordinated care activities. In this webinar, we will be discussing legal and operational considerations related to the management of the patient medical record, use of various technology options for the provision of the telemedicine encounter and compliance with legal and regulatory requirements associated with documenting care delivery.
