

## INFORMATION TECHNOLOGY CONSULTING

**In today's ever-changing world of information technology, health care organizations are expected to be leaders in data security and interoperability.**

Our trained team of IT consultants aims to help our clients with everything from the development of an IT strategy to implementation of medical device security protocol. Our singular focus on the health care industry, backed with years of experience consulting health systems, allows our team to provide a personalized IT strategy.

Our team focuses on four high-value, strategic services:

[IT Strategic Planning](#) [Cybersecurity](#) [Mergers and Acquisitions](#) [Business of IT](#)

Our IT consulting services begin with an audit and research into your organization's strategic goals and objectives as well as your existing IT infrastructure and practices. Based on our findings in the research phase, we will present our recommendations for necessary changes or additions. Our team of consultants can serve as an extension of your team, assisting with the implementation of the IT adjustments or coaching your team along the way. This proven process allows your organization to move change forward quickly and efficiently.
